

JANE DOE

SUMMARY

PeopleSoft developer with extensive experience in application support, development and performance tuning.

SKILLS

PeopleSoft, ADP Enterprise (HRizon and EV2), ReportSmith, , SQR, Microfocus COBOL, Java, HTML, XML, Oracle, MS SQL Server, DB2, PL/SQL, Developer 2000, Oracle Designer, Erwin, Brio, MS Access, Business Objects, PVCS, Unix Shell.

EXPERIENCE

7/03 to 9/03 **Levitz Furniture, Farmingdale, NY**
PeopleSoft Technical

- Customization of ADP Enterprise Payroll (PeopleSoft based) application.
- Worked directly with Finance Manager developed General Ledger Interface to export the data from Enterprise Payroll into Oracle Financial application.
- Wrote complex PL/SQL procedures for payroll data adjustments.

11/02 to 4/03 **AHRC Nassau, Brookville, NY**
PeopleSoft Technical

- Fixed bid project of implementation and customization of ADP HR/Payroll application, which ended below the budget and landed another contract for ADP.
- Involved in the full life cycle of system implementation.
- Worked directly with HR, Benefits and Payroll personnel, analyzing their requirements and presenting proposals for customization, when needed.
- Responsibilities included data modeling and design, coding (Panels, PeopleCode, SQRs) and documentation.

7/01 to 3/02 **Brown Brothers Harriman, Jersey City NJ**
PeopleSoft Technical

- Participated in upgrade of **PeopleSoft HR/Payroll to v.8.**
- Designed and developed custom Budget Planning decision support system on DB2 platform, using **SQR and PeopleTools.**

- Worked directly with the business community, translating their business requirements into a technical implementation model.
- Participated in the development of Web reporting applications within a financial data warehouse (Oracle/Unix). Responsibilities included system design and data mapping, programming and system integration, database security, application and database tuning. Used Brio, SQR, PL/SQL, Java, XML, HTML/JavaScript, Shell scripts and SQL Loader.
- Completed the entire project ahead of schedule and received superior feedback from client on the quality of my work.
- Assisted in SQL tuning and in investigating other programmers' Oracle problems.

**9/98 to 7/01 Janis Group/HR21, Rochelle Park, NJ
Senior Consultant**

- Worked with various clients on customizations of **PeopleSoft**-based applications (**HR, Benefits, Payroll**).
- Completed assignments concentrating on system enhancement using **PeopleTools (with PeopleCode and PL/SQL)**, and writing inbound and outbound interfaces **using SQR**.
- Responsibilities also included requirements study, data modeling and design, schema maintenance, performance tuning, and documentation.
- Received high praise from clients expressing their satisfaction and strong preference for having their projects assigned to me.

**11/97 to 9/98 Cover-All Technologies Inc., Fair Lawn, NJ
Systems Analyst**

- As a Project Leader, managed the development of Workers' Compensation system.
- Responsibilities included data modeling and design, documentation, implementation (using Forms Ver 4.5 and PL/SQL) and performance tuning. Although the project was given a tight time frame, the system was completed on time at a high-quality level, exceeding client expectations.

**1/97 to 11/97 Ernst & Young LLP, Data Center, Lyndhurst, NJ
Senior Systems Analyst**

- Responsible for development and maintenance of PeopleSoft applications in Oracle/Unix environment.
- Analyzed and built the data model (logical and physical) for Affirmative Action Plan Decision Support System and developed this system using PeopleTools and SQR. Maintained and enhanced the standard PeopleSoft panels.
- Wrote PL/SQL stored procedures to support front-end data manipulations, and SQR programs for the back end processing and reports. Also responsible for the maintenance of Business Objects Universes and User Security.

**5/92 to 1/97 Cover-All Technologies Inc., Fair Lawn, NJ
Legacy System Maintenance, Project Leader**

- Maintained and enhanced the Policy Issuance System for property, casualty and auto insurance, written in Microfocus COBOL using ORACLE database.

- Developed a 'Shell'-like system, which would allow users to easily build any Policy Issuance application. Responsible for system architecture, data modeling and design.
- Using Developer 2000, built Class libraries for system development. Responsibilities also included defining the processes for System Release and Version Control administration - all using PVCS tool.

EDUCATION

Bachelor in MIS - Institute of Management, Tel-Aviv, Israel
